### Routine Fluorescence Documentation

Axiocam 305 mono your 5 megapixel camera from ZEISS for high resolution imaging at fast speeds. State-of-the-art CMOS Global Shutter technology lets you follow and capture samples accurately. Thanks to its high dynamic range, you can acquire images with various high contrasts and intensities in a single image. A dark homogenous background helps you see even the finest structural details. And it's a really fast camera, acquiring up to 36 frames per second at full resolution.

Highly sensitive sensor technology and sophisticated camera engineering means your Axiocam 305 mono will deliver best quality images every time. The sensor is temperature-stabilized, resulting in reproducible quality and reduced background noise. Easy to use ZEN imaging software fully supports the robust camera performance by an intuitive user interface. Fast reaction times are assured through the high bandwidth USB 3.0 connection, which also provides the camera power.

### Highlights

- 5 Megapixel CMOS chip sensor
- Fast readout with 36 full frame images per second
- Small 3.45 micron pixels
- Easy and fast USB 3.0 connection, easy to operate, plug and play
- Global shutter readout avoids CMOS rolling shutter image distortions
- Compatible with all ZEISS microscope stands with a camera port
- Fast and efficient operation with ZEN imaging software
